Terminal Disclaimer

1. The terminal disclaimer filed on January 18, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 7,109,097 has been reviewed and is accepted. The terminal disclaimer has been recorded.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: This application teaches: (1) catalyst components for polymerizing olefins comprising Mg, Ti, CI, and OR groups, where R is a C₁₋₁₀ alkyl group optionally containing heteroatoms, or an ether having two or more ether groups, wherein a Mg/Ti weight ratio is lower than 3, a CI/Ti weight ratio is from 1.5 to 6, an OR/Ti weight ratio is from 0.5 to 3.5 and at least 50% of the titanium is in a valence state lower than 4; (2) a catalyst for polymerizing olefins obtained by contacting the above catalyst component with an organoaluminum compound and (3) a process for (co)polymerizing olefins of the formula CH2=CHR^{VIII} where R^{VIII} is H or a C₁₋₁₂ hydrocarbon group, carried out in the presence of a catalyst for polymerizing olefins obtained by contacting the above catalyst component with an organoaluminum compound. The prior art of record generally teaches the polymerization of olefins in the presence of catalysts containing Mg, Ti, CI, and OR groups but fails to teach or fairly suggest a Mg/Ti weight ratio is lower than 3, a CI/Ti weight ratio is from 1.5 to 6, an OR/Ti weight ratio is from 0.5 to 3.5 and at least 50% of

the titanium is in a valence state lower than 4 as claimed by applicants. Accordingly, this application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
